Automated Betting Setup PDF

This guide will explain how to connect your Betaminic account to your Bf Bot Manager software, and then how to import and start my bots sets for use with the Betaminic strategies. Setting up the software and bot set can be complicated, so if you have any problems while setting up things, please contact me by email, and if needed, we can have a Skype call where I screen share with you to demonstrate the process, or you screen share with me and I can check your settings with you. If you want a custom set of bot strategies making for use with Betaminic, please let me know. I can try to help you. (Different stake sizes, strategy names, staking plans, etc.)

1. How to connect your Betaminic account to your Bf Bot Manager software

- 2. How to import and start my bot sets
- 3. How to find and follow the Betaminic strategies.

1. How to connect your Betaminic account to your Bf Bot Manager software

 First, login to your Betaminic Builder on the Betaminic website. Go to the "Bf Bot Manager" tab in the Betamin Builder. Copy the first URL on that page by left-clicking on the green "copy" button. This is the "Recommended URL to Export Pending Picks for the next 6 hours". Your Bf Bot Manager URL is not there, email Betaminic to ask them to enable it on your account.

BF Bot Manager
You can now automate the picks of Betaminic strategies with BF Bot Manager. More info here.
Here you can find the URLs you need to use automated betting in BF Bot Manager.
Recommended URL to Export Pending Picks for the next 6 hours:
Recommended: For users who only want to load football markets for the next 6 hours on their BF Bot Manager betting software, reduce CPU load and avoid Betfair market errors.)
Alternative URL to Export All Available Pending Picks:
https://api.betaminic.com/bfbotcsv?apiToken=fe7a5b18-a3417a5b18:bc-7a5b18130002&picks=all
Option: For users who load markets for the next 2 days.
Technical note: Picks for markets not yet loaded by your BF Bot Manager software will appear with some red text in them until the markets are loaded, and then they will be accepted by the software and shown in black text.

Troubleshooting

A) If no picks appear in your "Manage Tips" form, check your Betaminic Pending Picks page to see if you have any picks for games due to kick-off in the enxt 6 hours. Only those tips will be imported. (This is for technical reasons connected to how Betfair manages it markets.)

B) If you want to force a test, you can copy the second "Alternative URL to Export All Available Pending Picks" URL from your Betaminc "Bf Bot Manager" page and enter that in the "Download tips from URL" form in the Bf Bot Manager "Tips form".

3 How to find and follow the Betaminic strategies

If you are logged into the Betamin Builder, then you can click on the links in my emails or PDF guides to go to the strategies.

You can also search for strate	gies by hame.								
1. To find and follow them: you can "search by name" on the Betamin Builder "Public strategies" page, and follow them there by clicking on the green "Follow" button.

I share my results on my Reddit community where other Betaminic users sometimes interact. https://www.reddit.com/r/AutomatedBettingBots/ You are welcome to join if you like.

1	The bots are usually setup for a 1000 GBP bank. (Please change the bank sizes of each bot if you want to change this.)
2	Each bot set bank is linked to each otherr and will place bets based on the overall P/L of all Betaminic bot strategies and add-on strategies together in that set.
3	The bots set includes "A" level stakes strategies that bet on each imported tip, and "B-Z" strategies that are triggered by the "A" strategies. This means the "A"
	strategies must be switched on to trigger bets.
4	BOT SETTINGS DISCLAIMER – USE AT OWN RISK
	This is the exact same bot set I am using. I make every effort to make sure the settings are correct, but there is always a chance of an error. Please be aware of this.
5	BANK EXPOSURE
	There is a chance that on Saturday peak times there might not be enough betting bank to place all bets. If this look like it might occur, then switch off the D05 and
	E09 Lay bots during peak periods which use up the most exposure.
