1.1

The **BSG Draw System** had a very good month and went over the +£7,000 for the first time a few days ago. The 0-0 Correct Score bot has been an important part of that winning run. The core system is working, but the bank management was the area giving problems. I feel that I have now solved that problem and am confident moving forward with my new bank management suggestions. I went [deep into looking at the drawdowns of various draw strategies](#) and my conclusion was that the ELS x 4 is the sensible, conservative figure to use as the Maximum Potential Expected Drawdown for each bot. 72% of all Betaminic draw strategies have an actual historical drawdown of between 1.5 to 4 x their ELS (Expected Losing Sequence) based on their win rate and number of bets in their data set. 100% of the 28% of Betaminic draw strategies with a MDD/ELS ratio higher than their ELSx4 had MDDs of 90 or higher. Also, 83% of ALL Betaminic public strategies have MDD/ELS ratio of their ELS x4 or less. This makes me confident that the ELSx4 figure is a good number to use to plan the possible maximum drawdown for EACH bot. I have made an Excel file that can be used for calculating the various ELS multiples based on a bots win rate and number of bets in their data set. You can download it [here](#) for free.

MDD/ELS Ratio	Number of Strategies	% of strategies
0.00 to 1.00	72	10%
1.01 to 2.00	217	29%
2.01 to 3.01	217	29%
3.01 to 4.00	114	15%
4.01 to 5.00	59	8%
5.01 to 6.00	32	4%
6.01 to 7.00	11	1%
7.01 to 8.00	6	<1%
8.01 to 9.00	7	<1%
9.01 to 10.00	3	<1%
10.01+	5	<1%

The practical result is this bank management suggestion:

BSG Draw System Bank Management	Calculate by Points	Calculate by Units
Starting Point	Use your <b>bank size</b> as your starting point	Use your <b>stake size</b> as your starting point
Profit per month from £10 6-bot set (Based on £10 bots Total Actual Profit <sup>1</sup> )	+7.5 points per month (+7.5 points is +7.5% of your bank)	+67 units per month (+67 units is 67 x your stake unit)
Target Profit from £1 6-bot set (Based on £1 bots monthly averages <sup>2</sup> )	+16 points per month (+16 points is +16% of your bank)	+141 units per month (+141 units is 141 x your stake unit)
Bank size	100 point bank	880 unit bank
Stake Size	0.11 point stakes (1 point = 1% of bank, so 0.11 points is 0.11%)	1 unit stakes
Actual Maximum Drawdown	-27.72 AMD (This would be -27.72% of your bank)	-252 AMD (This would be -252 x your stake unit)
Estimated Potential Maximum Drawdown (ELS x 4)	-96.8 EPMD (This would be -96.8% of your bank)	-880 EPMD (This would be -880 x your stake unit)

**Based on £10 bots Total Actual Profit<sup>1</sup>** This figure takes the total profit and divides it by the number of months that the system has run. This is a simplistic way since it does not take into account the fact that the 0-0 Correct score bot was only added 2 months ago, but the other 5 bots have been running for 10 months.

**Based on £1 bots monthly averages<sup>2</sup>** This figure is based on the £1 test bots that have been running the longest and have the most data, so I feel their data is more meaningful. The monthly average is calculated for each bot and the added together. In this way the 3 months of A6 data, 10 months of A3,A4,A5 bot data and 18 months of A1,A2 data can be balanced fairly in the calculations.

You can calculate your bank management plan by starting with your bank size or starting with your stake size.

For example, if your bank is £1,000, then your level stake should be 0.11% of that bank, which is £1.10.

The profit target is 16 points (+16%) per month. So you would hope for a +£160 increase on average per month.

We would be mentally prepared for drawdowns of -27% of the bank, but also be aware that we might have bad runs that could risk the entire bank.

Or, for example, if your starting level stake is £1, then you would need a bank of £880 for that. (880 units)

The profit target is 141 units per month. So you would hop for a +£141 increase on average per month.

We would be mentally prepared for drawdowns of -252 units (-£252) of the bank, but also be aware that we might have bad runs that could risk the entire bank.

I hope this makes it easier to plan your banks if you are following the 6 bot set.

1.2

The **Betaminic Draw System** had a winning month. And please note that the 0-0 correct score bot was dropped from this set last month. It does not work for the Betaminic Draw set the same way as it does for the BSG Draw Set.

I will unpause "Golden 6 No1 Big vs Good V2 AL2" which will rejoin the set.

I also reviewed the bank management suggestion for BetaminicDraw

Betaminic Draw System Bank Management	Calculate by Points	Calculate by Units
Starting Point	Use your <b>bank size</b> as your starting point	Use your <b>stake size</b> as your starting point
Profit per month from £10 5-bot set (Based on £10 bots Total Actual Profit)	+8.2 points per month (+8.2 points is +8.2% of your bank)	+59 units per month (+59 units is 59 x your stake unit)
Bank size	100 point bank	590 unit bank
Stake Size	0.17 point stakes (1 point = 1% of bank, so 0.11 points is 0.11%)	1 unit stakes
Actual Maximum Drawdown	-36 AMD (This would be -36% of your bank)	-210 AMD (This would be -210 x your stake unit)
Estimated Potential Maximum Drawdown (ELS x 4)	-99 EPMD (This would be -99% of your bank)	-590 EPMD (This would be -590 x your stake unit)

You can calculate your bank management plan by starting with your bank size or starting with your stake size.

For example, if your bank is £1,000, then your level stake should be 0.17% of that bank, which is £1.70.  
The profit target is 8.2 points (+8.2%) per month. So you would hope for a +£82 increase on average per month.  
We would be mentally prepared for drawdowns of -36% of the bank, but also be aware that we might have bad runs that could risk the entire bank.

Or, for example, if your starting level stake is £1, then you would need a bank of £590 for that. (590 units)  
The profit target is 59 units per month. So you would hop for a +£59 increase on average per month.  
We would be mentally prepared for drawdowns of -210 units (-£210) of the bank, but also be aware that we might have bad runs that could risk the entire bank.

I hope this makes it easier to plan your banks if you are following the 5-bot set. (No 0-0 Correct Score bot in the Betaminic Draw set.)

1.3  
My **2024 LD9** low drawdown set made a 0.6 unit loss after 83 bets. It is not a large amount of data, so this is just par for the course and within the historical variance.

1.4  
**Contend UD** finally showed signs of the good run I am expecting in 2024. Its +12 point increase from 25 bets was very welcome.

1.5  
The **BetaminicLdsys** set of 4 strategies had a small -1 unit loss from 52 bets. Again, it is not a large amount of data, so this is just par for the course and within the historical variance.

After 10 months of this new approach, my betting system as a whole is up 7.7k after costs. (The numbers in my last newsletter were incorrect. My excel sheet formulas had got mixed up.) The new drawdown calculations have meant my nominal bank has increased to 30,000, but I would like to note that I only have 7,000 of actual working capital available for my betting account. But if the worst case of unlucky negative variance comes all at the same time for all of the bot sets, then I am prepared to refill the bank up to a maximum of the nominal bank figure. From December 2023 and February 2024 felt like big losing months to me, but in the big picture it does not look so bad.

In theory, once my working bank catches up with my nominal bank, then I will withdraw any amount over the conservative 30k nominal bank. With each of the 5 systems aiming for £1,000 profit per month, then it aims for a meaningful withdrawal amount of around £5,000 per month.

## Betaminic Draw Bot System

Note: There are 2 versions; the Betamin Builder version and the TippingSports version. I recommend the TippingSports versions for simplicity, volatility and cost. I show both versions' results here so that we can track the individual performance of strategies that make up the set, and then we can judge when to add or remove trigger strategies.

**Betaminic's ShootingBets** service

I have been using this service on Bet365. I won about £1,000 by manual betting on the picks, but had my account closed by Bet365. I am now prepping an account with a new soft bookie William Hill to use the service with. I will try to follow the advice from Betaminic's article to avoid getting closed too quickly this time. <https://www.betaminic.com/betting-guide/23-tips-on-how-to-avoid-getting-banned-by-bookies-when-using-shootingbets/>

## 2.1 System Changes – Time to bet rule changed in bot sets

To avoid having IPT and non-IPT sets, I have changed all my time to bet rules for the inplay bots to this:

This means that the B3,B4,B5 inplay bots will be active from 10 seconds after kick-off until 95 minutes after kick-off. That should equate to 45m First Half + 15m Half Time break + 35m of the Second Half (The 80 minute mark). If games have long delays, this may mean it won't bet on late first goals, but I am okay with this. You can edit this yourself or ask me for the latest bot set.

## 2.2 System Changes – ApostasBF method of following BSG Draw System free

As you will have read in a previous email. It is now possible to follow the BSG Draw System for free via the ApostasBF Exchange, a white label version of Betfair. You can read more about it here.

<https://bettingsystemsguide.com/apostasbf-betfair/>

## 3 Current Betting System Setup Summary: Bank Size, Profit Targets, Costs, Drawdowns, Exit Points

I am now following 6 Betting Systems.

System 1: The BSG Draw System

System 2: Betaminic Draw Strategies

System 3: Tom's Low Drawdown Betaminic Set of 9 Strategies "2024 LD9"

System 4: Contend UD (My personal pick of a strategy I think is due a strong run in 2024)

System 5: Betaminic's Low Drawdown "BetaminicLdsys" Set of 4

System 6: Betaminic's ShootingBets service (Manual betting. Not automated)

I am using the Bf Bot Manager automated betting software to automate betting on these systems on Betfair.com.

I am also using IPT In Play Trading data to fill in the gaps for the Betfair livescores.

I am also using ApostasBF and its free ATZbet tool as a non-Betfair.com way to follow my BSG draw system.

See my website for more details on how to set them up:

<https://bettingsystemsguide.com/betting-systems/>

Email me if you want to use any of my bot sets.

#### Betaminic's ShootingBets service

1	ShootingBets	<a href="https://www.betaminic.com/shootingbets/">https://www.betaminic.com/shootingbets/</a>
---	--------------	---

I'm pretty new to this one. My plan is to prep my soft bookie account by making small 10 GBP bets on **Banker???** picks or obvious home favourite bets with 1.10 to 1.30 odds, then increase to 100 GBP. Then add in the ShootingBets bets with 100 GBP bets to maximise profit before they limit or close my account. I will try to stick to football, basketball and tennis bets. After each ShootingBets bet, I will place a 100 GBP bet on a related market on a low odds bet to make it seem like I am a mug punter for that event. If you use this service be sure to read this article: <https://www.betaminic.com/betting-guide/23-tips-on-how-to-avoid-getting-banned-by-bookies-when-using-shootingbets/>
