

ApostasBF Setup Guide

This guide will take you through the steps to:

- 1 Access, view and register on ApostasBF**
- 2 Make a deposit using Tether (USDT TRC-20)**
- 3 Setup free automated betting on my BSG draw system**
- 4 Setup free automated betting on Cid Marcos's betting systems**
- 5 View your bets and account activity**
- 6 Connect to the various ApostasBF tools**

If you have any questions, you can email them directly to ApostasBF or ask me:

info@apstasbf.com

bettingsystemsguide@gmail.com

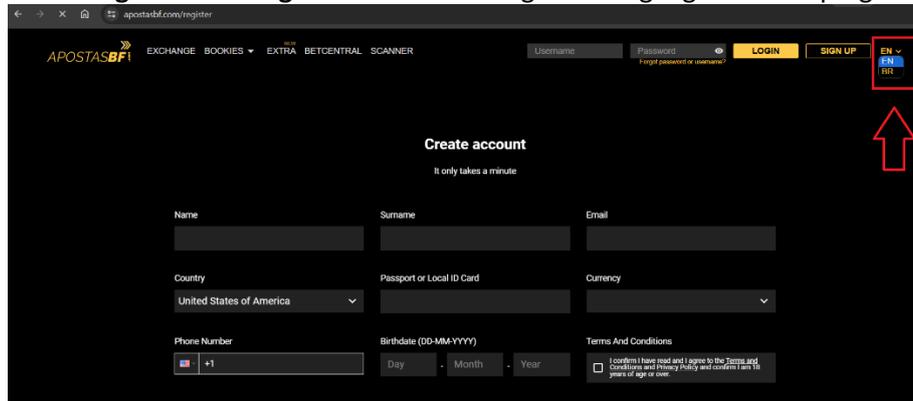

1 Access, view and register on ApostasBF

1.1 Click on this link to go to the site and register.

<https://apostasbf.com/register?affid=NTylvc>

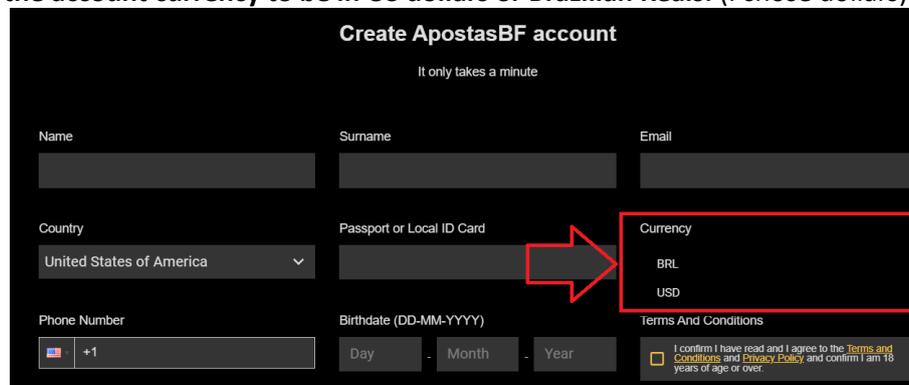

(You need to use my affiliate link to register and become my referral, or the BSG draw system will not be free and you will still need to pay a monthly subscription.)

1.2 The ApstasBF site is in English or Portuguese. You can change the language at the top right drop down menu.

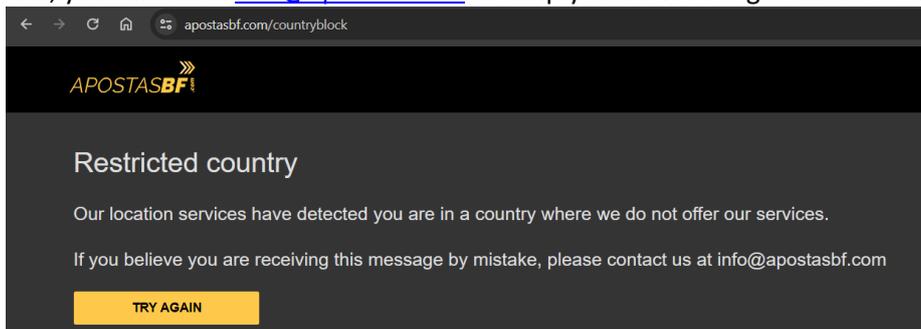

1.2 You will need to enter your passport numbers or national ID card number if you have one. Either is okay.

1.3 You can choose the account currency to be in US dollars or Brazilian Reals. (I chose dollars)

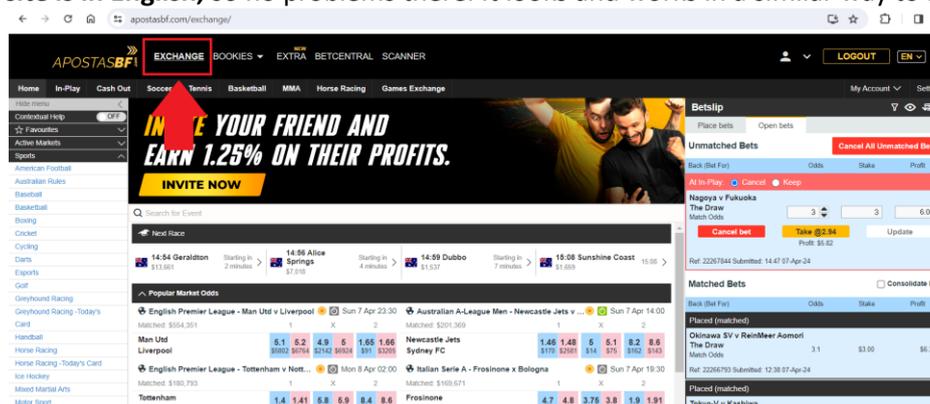

1.4 ApostasBF accepts customers from any country where online betting is legal except the USA.

You are responsible to check and know the laws for your own country. If you get a “Restricted Country” message, and you think it is a mistake, you can email info@apostasbf.com or simply use a VPN to get access to the site.

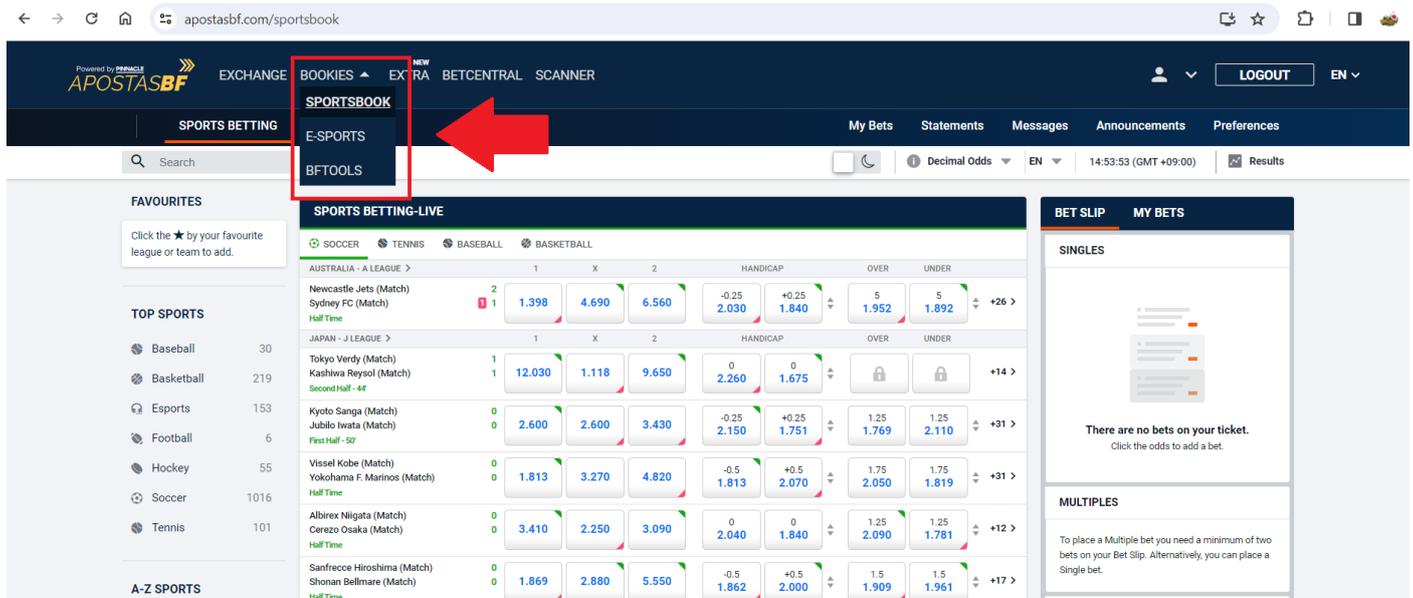

[TunnelBear](#) offers a free VPN with 2GB per month of bandwidth. This is enough to register, check out the site, make deposits and setup your automated betting.

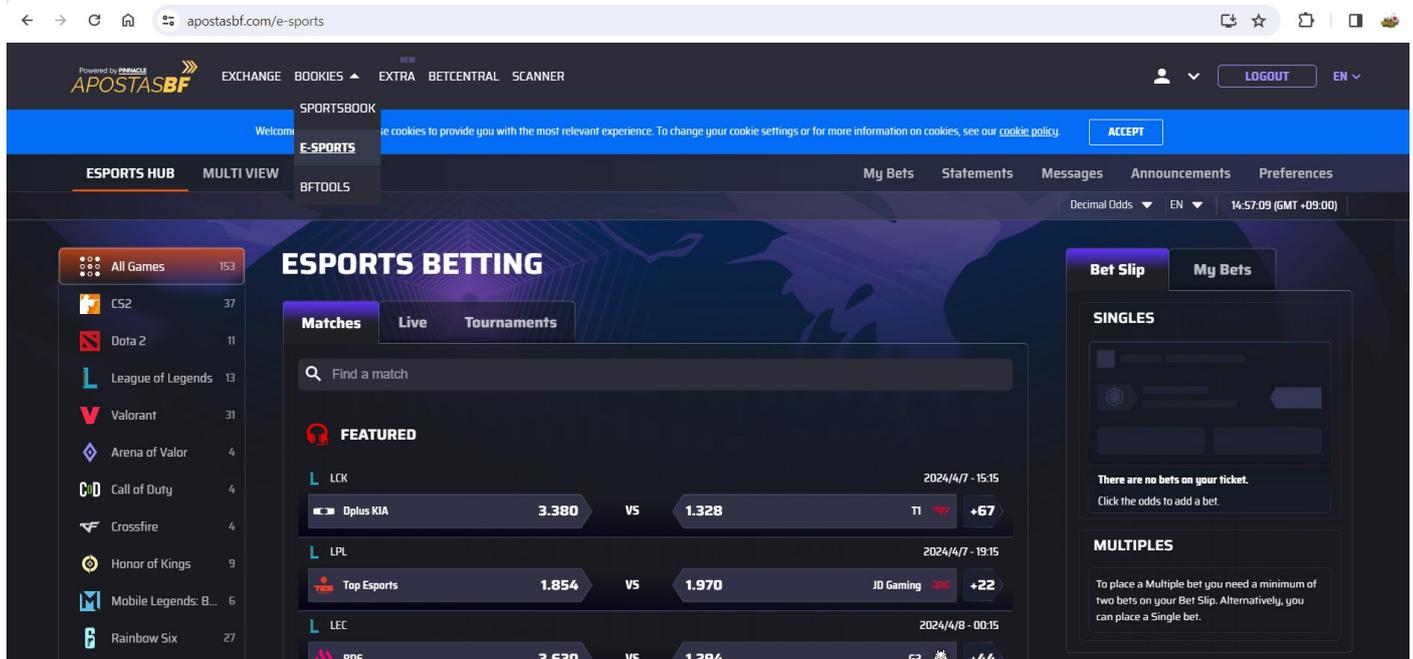

1.5 The ApostasBF site is in English, so no problems there. It looks and works in a similar way to Betfair.

1.6 If you click on the “Bookies” drop down menu, then you can select a Sportsbook that is very similar to Pinnacle.

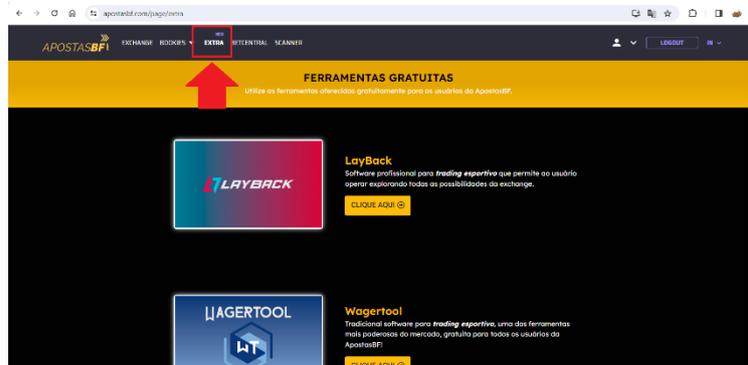

1.7 There is also an E-sports sportsbook.

1.8 Click on “EXTRA” to view the other tools that you can connect to your ApostasBF Exchange account.

Currently there are 8 tools on this page:

- LayBack
- WagerTool
- RadarW
- MyStats
- ATZBET Automatiza.bt (Copy Trade)
- BuscaBet
- BF Stats
- BF Odds

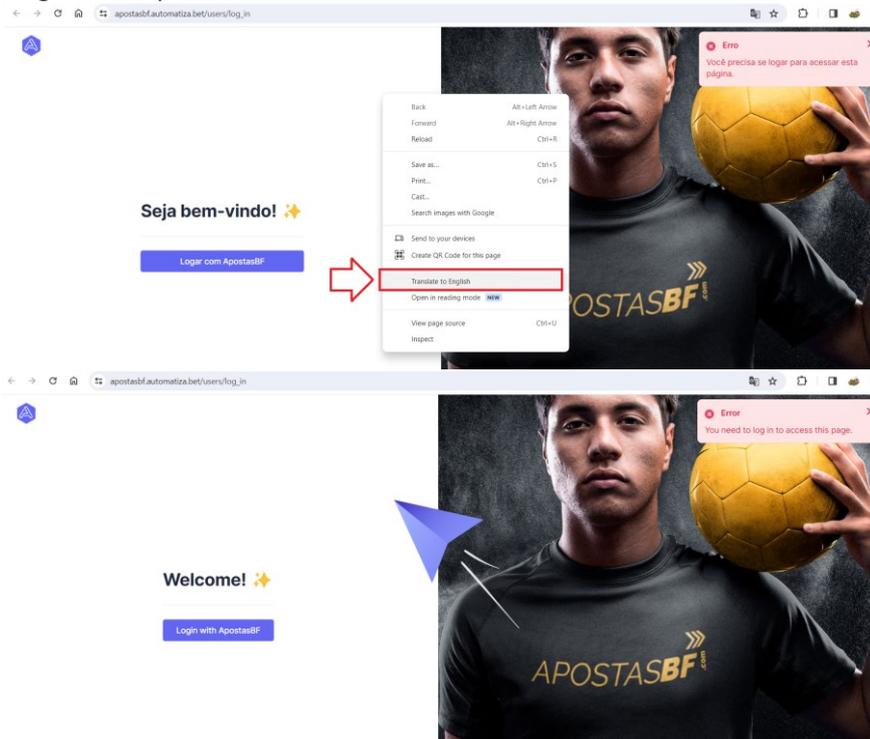

This page is only in Portuguese at the moment, but it is not a problem. Just click on the tool that you want to view and it will take you to that page.

1.9 ATZBET Automatiza.bt (Copy Trade)

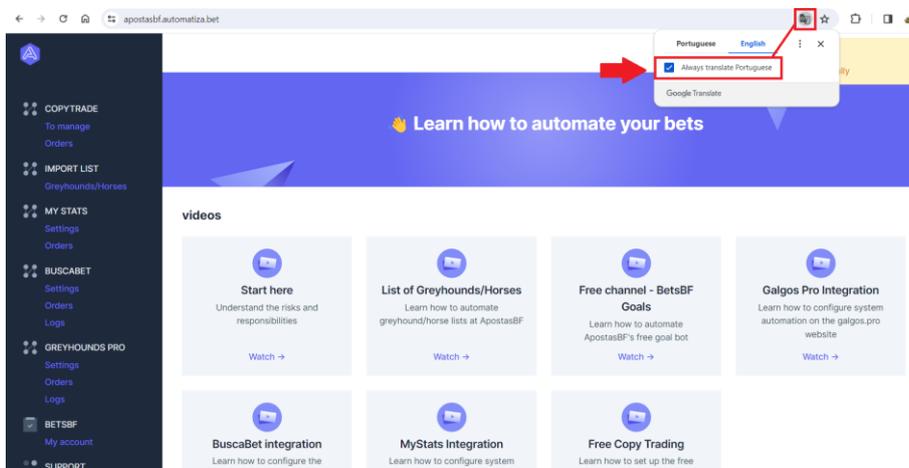

This tool will show up in Portuguese, but you can translate it easily with some browsers.

In Google's Chrome internet browser, you can right click and select "Translate to English".

You can then click on "Login with ApostasBF".

You can tick the "Always translate Portuguese" checkbox in the Google Chrome Translate add-on menu so that it saves time in the future. You can look around the various tools, ATZBET and the other tools, thanks to Google Translate.

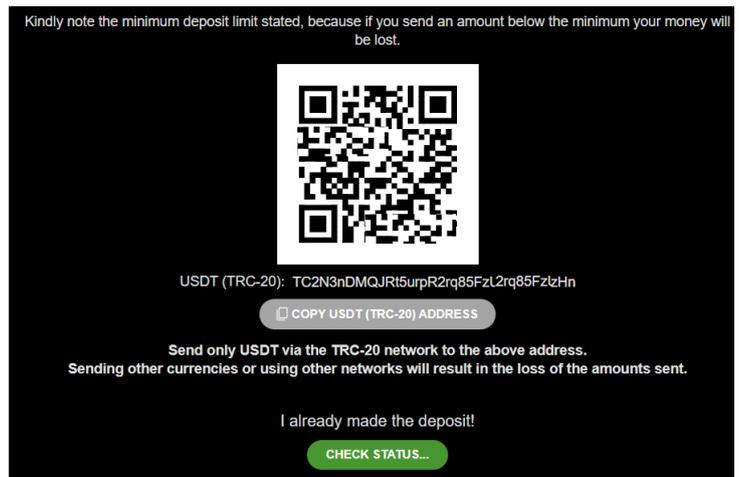

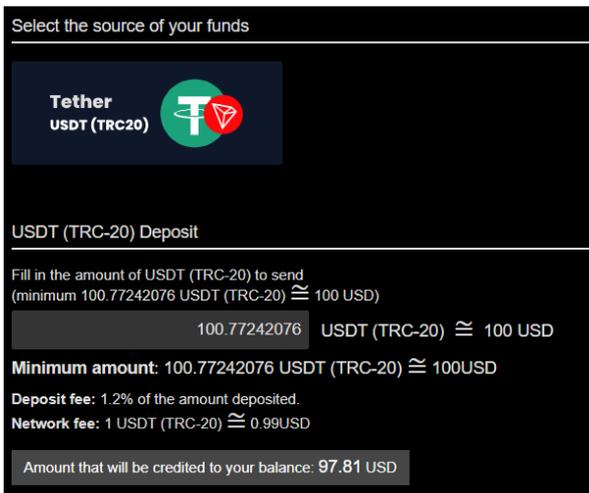

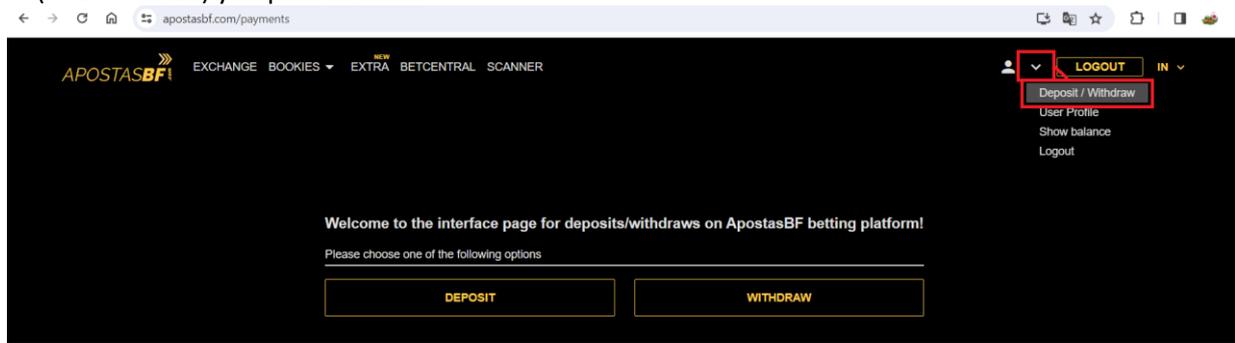

The top left "COPY TRADE" tool is the one we will use to automate betting on the BSG Draw System.

Have a look around the site and tools, then let's make a deposit to get started.

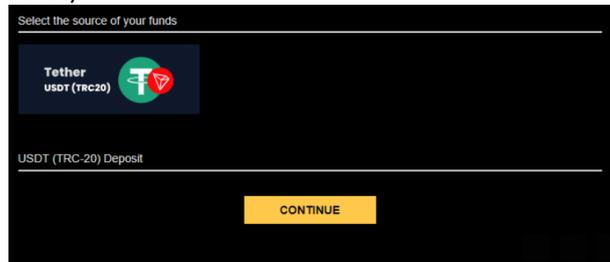

2 Make a deposit using Tether (USDT TRC-20)

2.1 You can only deposit into ApostasBF using Tether (USDT TRC-20).

The Deposit page will tell you how much USD you will end up with in your account after transfer fees for the amount of Tether (USDT TRC-20) you plan to send.

Troubleshooting: If you can only see a "CONTINUE" button and do not see your QR code and your personal Tether wallet address, then please email info@apstasbf.com to tell them. (They may need to manually click something on their end to mov the process forward.)

2.2 If you edit the Tether USDT (TRC-20) figure "1" amount to send, then it will tell you how much actual USD balance you will end up with after fees in the bottom figure "2".

It also shows what that initial Tether USDT figure "1" is currently equivalent to in US dollars in figure "3".

I will do a demonstration for 1,000 dollars.

To end up with 1,000 USD in your account, you would need to send 1021 USDT which is worth about 1013 USD. So that is about 1.3% in fees for this part of the process.

2.3 Next we need to buy Tether USDT (TRC-20) to send to our ApostasBF account.

Cryptocurrency exchanges will let you buy with a variety of methods such as credit card, debit card, electronic money or bank transfer.

Tether USDT is a cryptocurrency that pegs itself to the US dollar. So 100 USDT is meant to be the same value as about 100 USD. Thus the name, because it “tethers” itself to the US dollar. Tether is a cryptocurrency stablecoin, launched by the company Tether Limited Inc. in 2014

IMPORTANT: There are 2 different US dollar versions of Tether.

Tether USDT (TRC-20) is used with the Tron network.

Tether USDT (ERC-20) is used with the Ethereum network.

Tether USDT (ERC-20) CANNOT be sent to Tether USDT (TRC-20) accounts, so it is very important that we are careful to buy Tether USDT (TRC-20).

ERC-20 USDT tokens are hosted on the Ethereum blockchain and typically have addresses that start with “0x”. In contrast, TRC-20 USDT tokens are on the Tron network and have addresses that begin with “T.” Always verify the network compatibility of your wallet or exchange to ensure you are using the correct version.

We will need to buy 2 cryptocurrencies to send money to ApostasBF.

1 Tether USDT (TRC-20)

2 Tron TRX

The Tether USDT (TRC-20) is the actual funds we will send to ApostasBF.

The Tron TRX pays the Tron network to send the money. Think of it as the “postage stamp”.

2.4 Sign up for a Cryptocurrency Exchange that lets you buy Tether USDT (TRC-20).

Binance is a famous cryptocurrency exchange. You can check if they handle Tether USDT (TRC-20) in your country. Otherwise, try a google search for “Buy Tether USDT (TRC-20) in Denmark” or wherever you are located.

2.5 Purchase cryptocurrency

1 Buy Tether USDT (TRC-20) for the amount you want to send.

e.g. To end up with 1,000 USD in your account, you would need to send 1021 USDT. So you will need to end up with 1,021 USDT in your cryptocurrency exchange account after the cryptocurrency exchange purchase costs.

2 Buy Tron TRX. It costs about 31 TRX to send a payment. (About 3.72 USD).

You can buy just enough for one transfer, or you can buy a little extra so that you have TRX ready to use for another transfer in the future.

2.6 Send the USDT to ApostasBF.

It is best to copy and paste the address directly from the ApostasBF website deposit page.

There is also a QR code that can be read by your smartphone app to make sure you get the right address.

The USDT address on your account page is unique to you.

You don’t need to tell them exactly how much you are sending.

After you send the money, click the “check status” button.

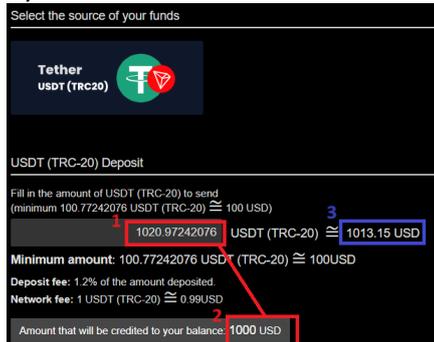

My money was credited to my account 10 seconds after I clicked “check status”.

An email was also sent with details confirming the transfer.

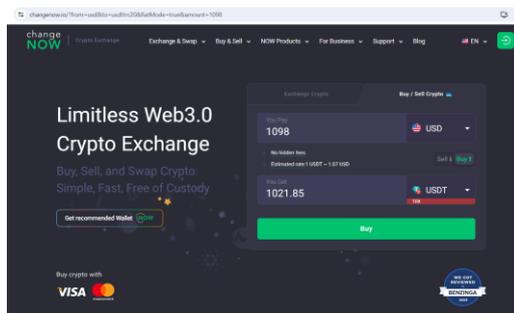

2.7 Example for 1,000 USD:

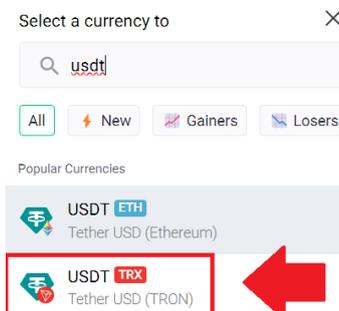

2.7.1 From the ApostasBF deposit page I see that I need to send 1021 USDT to end up with 1,000 USD in my account.

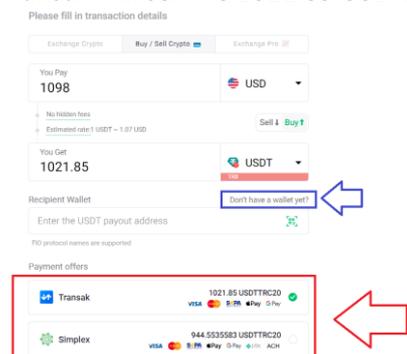

2.7.2 Using <https://changenow.io/> they are offering 1021.85 USDT for 1,098 USD.

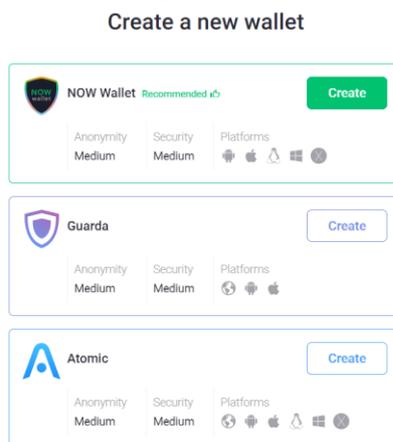

2.7.3 Make sure you are buying USDT (TRC-20) for the TRON network. The cryptocurrency exchange should clearly show which USDT you are buying.

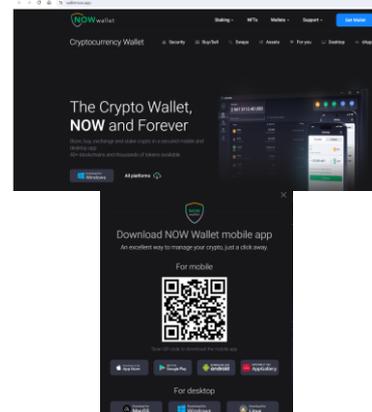

2.7.4 I want 1,021 USDT. When I click on the purchase button I get a choice of payment methods. The amount of USDT I get after purchase costs is shown. In this case Transak will sell me 1021.85 USDT.

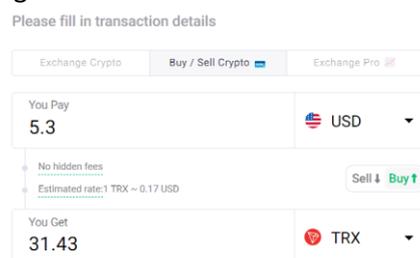

2.7.5 I don't have a cryptocurrency wallet yet, so I click on "Don't have a wallet yet?" It gives me a selection of crypto wallet services to choose from.

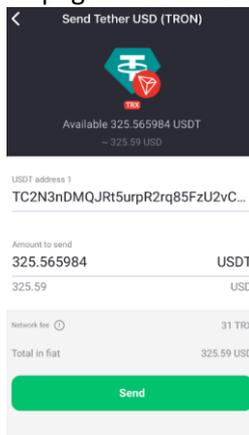

2.7.6 For example, let's choose a "NOW wallet". You can install it on your phone or PC. Once inside your NOW wallet app, you should be able to make the purchase inside there.

2.7.7 I also need 31 TRON (TRX) to send the payment. I buy this separately in the same app. I get 32.43 TRX for 5.3 USD.

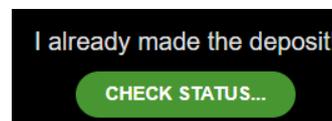

2.7.8 I use my phone app to send the USDT to the ApostasBF account address shown in my deposit page. I used the QR code.

(Note: This screenshot is from a deposit of 325 USD)

2.7.9 I click the "Check status" button in my ApostasBF account deposit page. The funds should appear in the account soon.

If there is any query, email info@apstasbf.com

Note: The fees to buy cryptocurrency vary depending on your country of residence, the crypto exchange that you use and also the payment method you choose. Some companies have fixed fees and others have fixed + variable fees. It is likely cheaper to send one large amount rather than several smaller amounts. Also, I had my credit card rejected but my debit card was accepted. Some credit card companies may not allow cryptocurrency purchases.

For comparison, with the company I used (<https://changenow.io/>) I got these quotes:

Deposit amount	Amount I actually pay in crypto and transfer fees	Transfer fee	Transfer fee as % of deposit	Notes
\$100	\$118.3	\$18.3	18.3%	\$113 for 103.36 USDT \$5.3 for 31.43 TRX 103.36 USDT sent to ApostasBF, \$100 credited to account
\$300	\$336.3	\$36.3	12.1%	\$331 for 307.1 USDT \$5.3 for 31.43 TRX 307.1 USDT sent to ApostasBF, \$300 credited to account
\$1,000	\$1,103	\$103	10.3%	\$1,098 for 1,021 USDT \$5.3 for 31.43 TRX 1,021 USDT sent to ApostasBF, \$1,000 credited to account

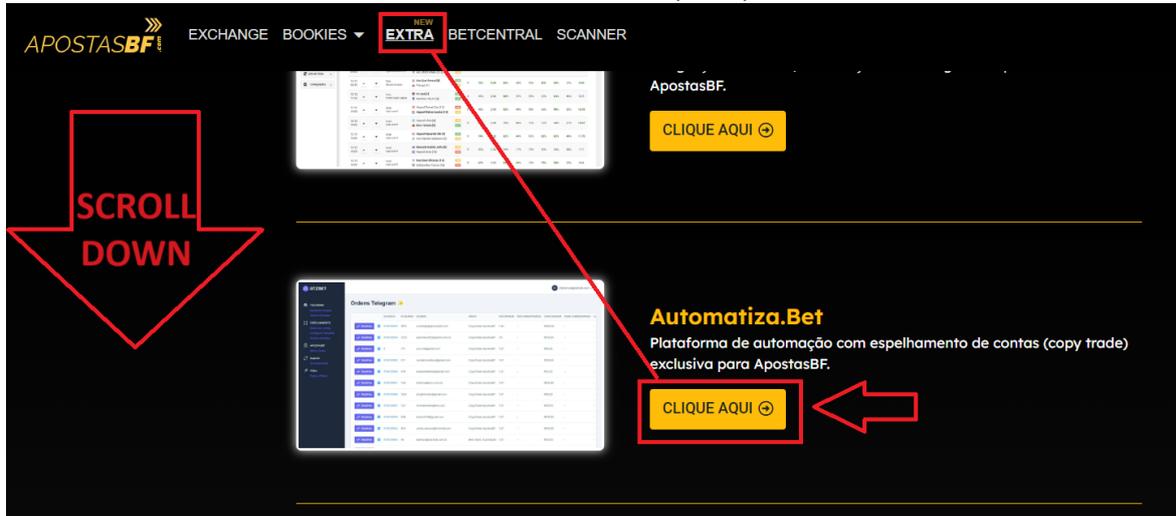

If you are using other Asian Bookmakers or Betting Agents to access other Betfair white labels, then the transfer fees you pay there may be similar amounts, so these transfer fees will be no surprise, and larger transfers make sense.

3 Setup free automated betting on my BSG draw system

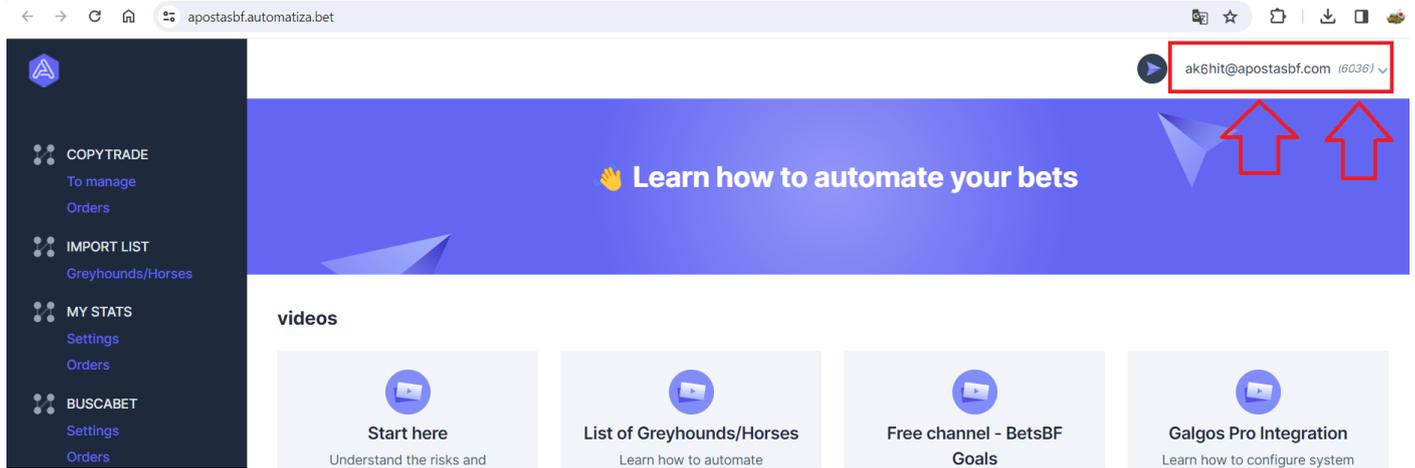

3.1 Email me at bettingssystemsguide@gmail.com to tell me your ATZBET username and ATZBET number, and also tell me which BSG bots you would like to follow.

In the email, tell me your ATZBET username and number.

Click on "EXTRA" and scroll down to Automatiza.bet. Click on "Clique aqui".

In ATZBET, you can see your username and number at the top right of ATZBET (Automatiza.bet)

In the email, tell me which bots you would like to follow.

e.g. BSG Draw System bots B2,B3,B6

The below data is from 2024-4-7 and shows my £10 and £1 stake bot sets.

The £1 stake bots have been running the longest, so I usually look at their data to make my decisions.

Group by: BSG Draw System TippingSports (Since 2023-6-28) (P/L: £5,396.04)				Group by: BSG Draw System 01 Original Test Bots (P/L: £1,125.94)

P/L: £5,396.04				P/L: £1,125.94					

I recommend the B2,B3,B6 bots to start with.

B2 places pre-match bets on the draw.

B3 places in-play bets on the draw.

B6 places pre-match bets on the 0-0 Correct Score.

BSG 3-bot set for ApostasBF: B2,B3,B6

100-point bank, +22 points per month,

0.21 points per bet, -473 point estimated maximum drawdown (473 x 0.21 point stakes = 99.33 points)

If \$3 stakes

+\$310 per month average over 6 months

\$1,400 bank recommended.

If \$10 stakes

+\$1,000 per month average over 6 months

\$4,500 bank recommended.

Read more about my bot drawdown calculations here.

<https://bettingssystemsguide.com/reducing-draw-system-drawdowns/>

3.2 Set the stakes on your bots.

I will approve your account to have access to my bots. I will email you after I have done that to let you know.

Go to your ATZBET page.

Click on "To manage" under the Copy/Trade menu on the top left.

You will see a list of bots that have been connected to your ATZBET from external sources.

The screenshot shows the ATZBET interface. On the left, a dark sidebar menu has a yellow box around the 'To manage' option under the 'COPYTRADE' section, with a yellow arrow pointing to it. The main area displays a table of bots with columns: GROUP, MAX STAKE (R\$), STAKE MIN (R\$), MINIMUM ODD, ASSET FOR TRADER, REVERSE BET, ACTIVE UNTIL, and a 'To edit' button. Three bots are listed: 'BetsBF - Goals (FREE)', 'BSG A2 Bot', 'BSG A3 Bot', and 'BSG A6 Bot'. The 'BSG A2 Bot', 'BSG A3 Bot', and 'BSG A6 Bot' rows are highlighted with a green border, and their 'To edit' buttons are highlighted with an orange border. Below the table, there are three text boxes: 'Bots not switched on yet' (red), 'My bots will be name "BSG..."' (green), and 'Edit the stakes here.' (orange).

Click the "To edit" button on the right to set the stakes.

To set level stakes, then make the min and max stake value the same.

If you want to stake \$10 level stakes on every bet, then set the min and max stake to \$10.

The smallest number that can be used is \$3, so \$3 is the effective minimum bet.

If you want to stake \$3 level stakes on every bet, then set the min and max stake to \$3.

Set the minimum odds to "0".

See the next step for details on what happens if you set different values for the min/max stake levels.

The screenshot shows the 'Edit configuration' form. It has a title 'Edit configuration' and a subtitle 'Maximum Stake (R\$)'. Below the subtitle is a dropdown menu with '3.0' selected. Below that is a text input field for 'Minimum Stake (R\$)' with '3.0' entered. Below that is a text input field for 'Minimum Odd' with '0' entered. There is a checkbox for 'Reverse Bet' which is unchecked. Below the checkbox is the text 'Check this option to bet against the Trader/Bot'. At the bottom of the form is a blue button labeled 'To save'.

3.3 Set you bank size

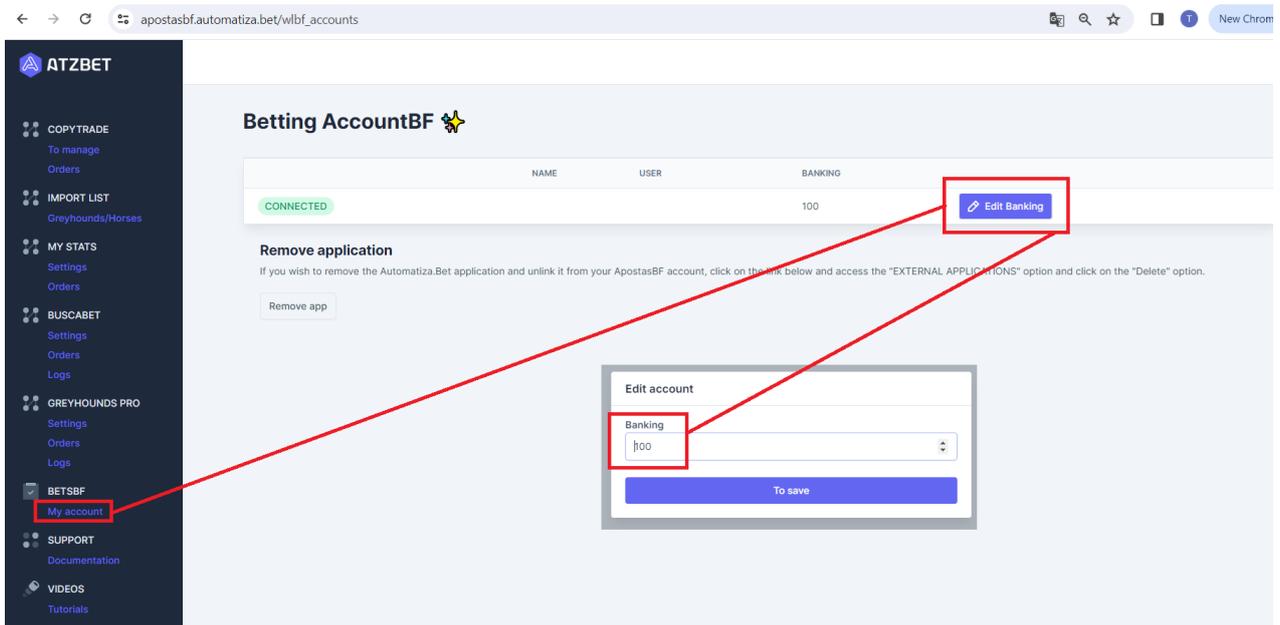

You must set a bank size. The default is 100.

Go to ATZBET. Click on the "BETSBF" > "My account" option in the left menu.

Click "Edit Banking" and set you bank.

If you have set the min/max stake for each bot as the same value, then the bank size is not relevant.

This bank size is only relevant if you set different values for the min and max bets of a bot.

What is this bank for?

Bet instructions from bots will be sent with a percentage (%) of bank stake instruction.

Enter the bank size that you want your bots to use when calculating the stake size based on a percentage.

This bank size is applied to all automated bets.

The min/max stake rule for each bot overrides any calculations made using the % of betting bank rule.

The bank size set here will be used to calculate % stakes, not your actual ApostasBF balance.

Example 1

ApostasBF Balance: \$4,532

Betting Bank Setting: \$100

Bot1 Minimum Bet Setting: \$3

Bot1 Maximum Bet Setting: \$10

Bet Instruction: stake 1% of betting bank

In this example, a bet instruction with 1% stake is sent to your ATZBET account, and your betting bank is set to \$100, your ApostasBF balance is \$4,532, and your Bot1 min/max stakes are set to \$3/\$10.

In this case, 1% of your \$100 betting bank will be used, not 1% of your ApostasBF balance.

1% of \$100 is \$1.

But the minimum stake of Bot1 is \$3, so it will bet \$3.

Example 2

ApostasBF Balance: \$4,532

Betting Bank Setting: \$2000

Bot1 Minimum Bet Setting: \$3

Bot1 Maximum Bet Setting: \$10

Bet Instruction: stake 1% of betting bank

In this example, a bet instruction with 1% stake is sent to your ATZBET account, and your betting bank is set to \$2000, your ApostasBF balance is \$4,532, and your Bot1 min/max stakes are set to \$3/\$10.

In this case, 1% of your \$2000 betting bank will be used, not 1% of your ApostasBF balance.

1% of \$2000 is \$20.

But the maximum stake of Bot1 is \$10, so it will bet \$10.

Example 3

ApostasBF Balance: \$4,532

Betting Bank Setting: \$800

Bot1 Minimum Bet Setting: \$3

Bot1 Maximum Bet Setting: \$10

Bet Instruction: stake 1% of betting bank

In this example, a bet instruction with 1% stake is sent to your ATZBET account, and your betting bank is set to \$800, your ApostasBF balance is \$4,532, and your Bot1 min/max stakes are set to \$3/\$10.

In this case, 1% of your \$800 betting bank will be used, not 1% of your ApostasBF balance.

1% of \$800 is \$8.

\$8 is within your min/max stake setting of \$3/\$10, so it will be \$8.

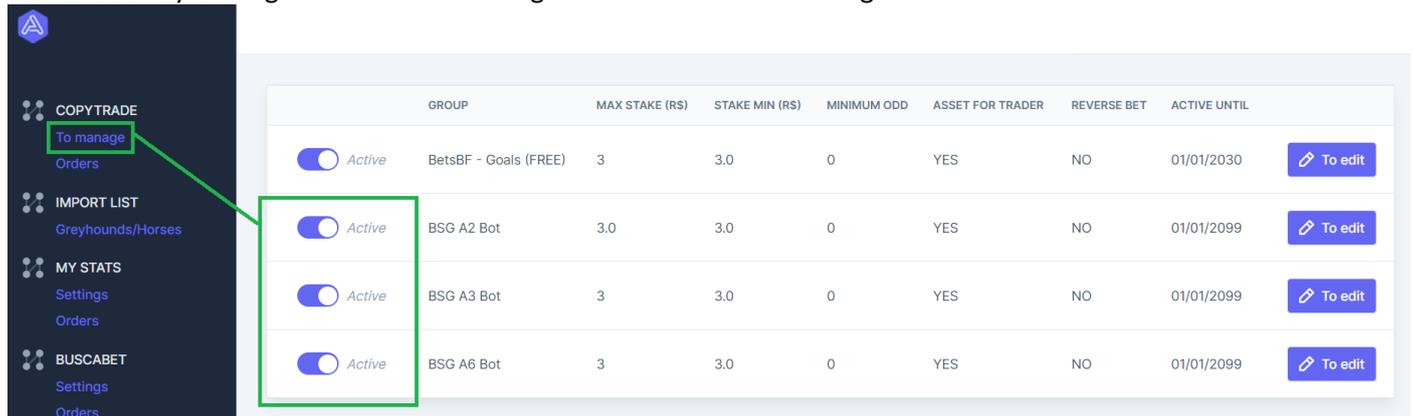

The betting bank DOES NOT increase or decrease based on profits and losses. It is a fixed starting bank level that is used to calculate stakes based on the bot instructions % of bank staking rule.

The bet instruction % depends on each bot and is set by the bot creator. My BSG draw bots send all bets with a 1% of bank stake instruction. For other bots you would need to contact the creator of the bot to find out the % stake setting.

3.4 Switch on your bets when you are happy with the settings.

Click the button for each bot to "Active"

There is a free "BetsBF – Goals (FREE)" bot that will be available, too. It bets on matches where it expects a goal to be scored soon by betting on the next over x.5 goal markets. I am also using this one.

The screenshot shows a sidebar menu on the left with options: COPYTRADE (To manage, Orders), IMPORT LIST (Greyhounds/Horses), MY STATS (Settings, Orders), and BUSCABET (Settings, Orders). The main area displays a table of bots with the following columns: GROUP, MAX STAKE (RS), STAKE MIN (RS), MINIMUM ODD, ASSET FOR TRADER, REVERSE BET, ACTIVE UNTIL, and a 'To edit' button. All bots shown are active.

GROUP	MAX STAKE (RS)	STAKE MIN (RS)	MINIMUM ODD	ASSET FOR TRADER	REVERSE BET	ACTIVE UNTIL	To edit
BetsBF - Goals (FREE)	3	3.0	0	YES	NO	01/01/2030	To edit
BSG A2 Bot	3.0	3.0	0	YES	NO	01/01/2099	To edit
BSG A3 Bot	3	3.0	0	YES	NO	01/01/2099	To edit
BSG A6 Bot	3	3.0	0	YES	NO	01/01/2099	To edit

3.5 Review the bets placed by the bots in the "Orders" screen.

Here you will be able to see pending and settled bets.

It has the result, the sent odds, the matched odds, the stake, the profit/loss, bet type, and fixture.

The screenshot shows the same sidebar menu as in 3.4, with 'Orders' selected. The main area displays a list of bets with the following columns: Details, ID, Bot Name, Sent Odds, Matched Odds, Stake, Profit/Loss, Bet Type, and Fixture. The bets are listed in a table format.

Details	ID	Bot Name	Sent Odds	Matched Odds	Stake	Profit/Loss	Bet Type	Fixture

4 Setup free automated betting on Cid Marcos's betting systems from BuscaBet

BuscaBet is a backtesting tool similar to Betaminic, except there are important differences in the database.

Both of them are good, and it is worth following strategies from both databases.

There are some free to use strategies in BuscaBet that you can follow straight away.

You need a balance of \$40 in your ApostasBF account to be able to access this tool.

	BuscaBet	Betaminic
Source of odds data	Betfair sportsbook* (*If odds for an event are not available, other bookmaker odds may be used.)	Pinnacle only
Qualifying selections method	Qualifying selections are found using current Betfair Sportsbook odds. If a selection's odds were not in the selected odds range at 12 hours before KO, but the odds later move into the filter range, then the selection WILL be used. This means it looks at odds before AND after market forces push it up and down. The cut off point is 6 hours before KO. This is very different to the selection finding method of Betaminic's Betamin Builder.	Qualifying selections are found using Pinnacle opening odds. If a selection's opening odds were not in the selected odds range, the selection will not be used, even if its odds later move into the filter range. It ONLY looks at the opening odds which are a product of the Pinnacle betting model BEFORE market forces push it up or down.
Strategy results calculation	Results are calculated using Betfair Sportsbook closing odds.	Results are calculated using Pinnacle closing odds.
Leagues	73 leagues data since 2017	111 leagues data since 2012
Markets	Match Odds Draw No Bet (DNB) Both Teams To Score (BTTS) Half Time Over/Under 0.5 goals FT Over/Under 1.5 goals FT Over/Under 2.5 goals FT Over/Under 3.5 goals FT Over/Under 4.5 goals FT Over/Under 0.5 goals HT Over/Under 1.5 goals HT Over/Under 2.5 goals HT	Match Odds Over/Under 2.5 goals FT Draw No Bet (DNB) Double Chance

Note: The strategy settings on BuscaBet and Betaminic are not compatible or interchangeable. Since both databases use different sportsbook odds and also different qualifying selection finding methods, their settings cannot just be copied over to the other. They will find different selections with the same settings. For this reason it is worth following strategies from both databases since they find different trends.

To follow the free strategies in BuscaBet

4.1 Click on the "Recommended" option in the menu on the left.

(If it appears in Portuguese, in Google Chrome browser, right-click and select "Translate")

There are 10 strategies there at the moment.

Basic details are shown, such as ROI, win rate and number of bets.

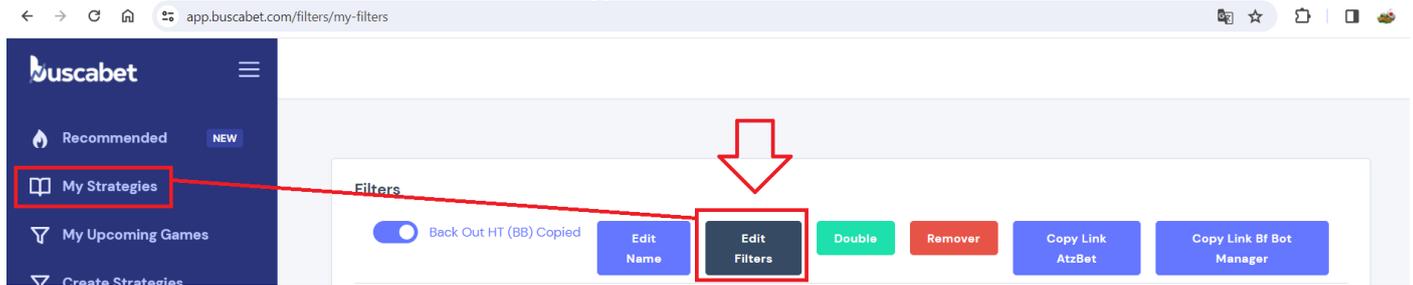

To see more details and take steps to follow the strategy, click "Copy this strategy".

The screenshot shows the BuscaBet interface. On the left, a dark blue sidebar contains a menu with 'Recommended' highlighted in red. The main content area displays a strategy titled 'First Half (Visitor)'. It includes a summary of performance: 'If you had bet €5,180,86 since the beginning of this strategy, you would have made a profit of €5,2382,00, in 225 bets, with an ROI of 10.14%'. Below this, a table lists key statistics: Total bets (225), Average monthly bets (3.13), Strike rate % (62.67/37.33), Average odds (1.77), Maximum damage (-3.72), Profit prejudice (22.82), Longest Positive/Negative sequence (7/5), and ROI (10.14%). At the bottom, there is a table of 'Upcoming games' with columns for Hour, Event, Competition, Country, Odd, and Result. A red box highlights the 'Copy the strategy' button in the top right of the strategy details section.

4.2 Right-click "My Strategies" and select "Open in new tab".

You will see the strategy there.

Click on "Edit Filters" to see details of the strategy.

Note that the strategy name sometimes changes from the Recommended page to the My Strategies page.

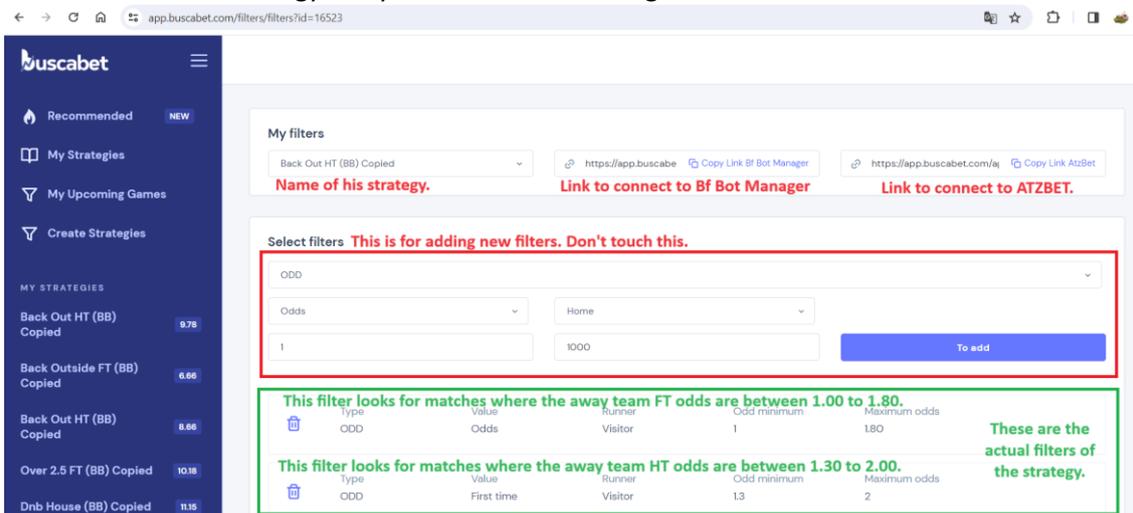

The "First Half (Visitor)" Recommended strategy has become "Back Out HT (BB) Copied" on the My Strategies page.

The natural English would be "Half Time (Away)" and "Back Away HT (BB) Copied"

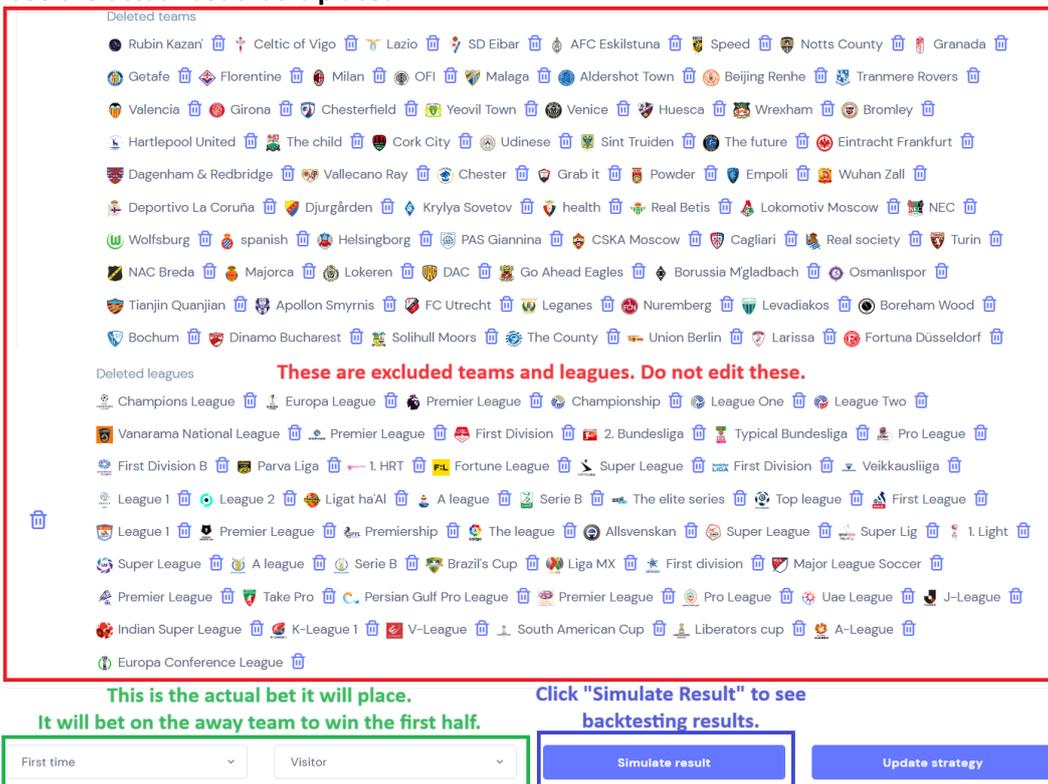

Even staying in Portuguese the strategy name also slightly changes.

The "Primeiro Tempo (Visitante)" Recommended strategy has become "Back For a HT (BB) Copado" on the My Strategies page.

You can see the filters for the strategy. They are the text on the right of the "bin" icons.

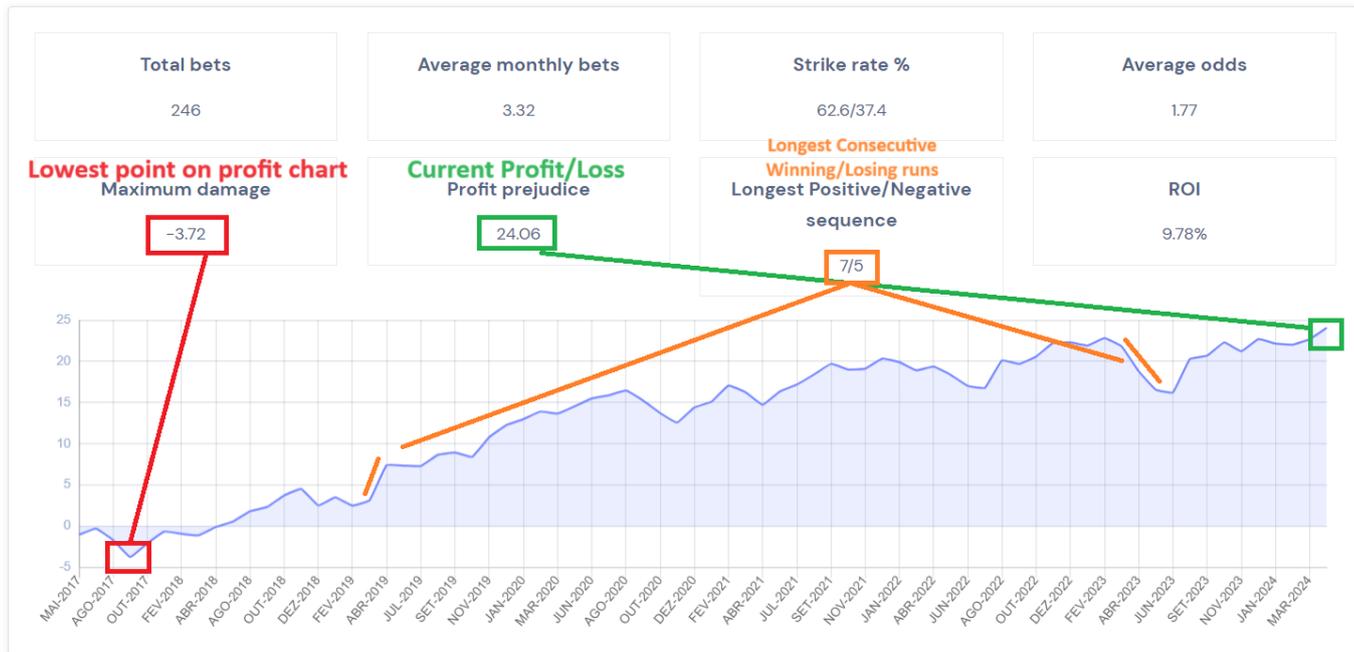

Scroll down to see the actual bet that is placed.

Click "Simulate Result" to see the historical results of backtesting these filters.

This shows you the important historical details of the strategy.

Simulation

Note that the Maximum Drawdown from a winning peak to losing valley is not shown. We need to check that ourselves by hovering over the graph and judging for ourselves.

In the example below, there was a peak of 22.80 which went down to 16.22. So I can say that the Actual Maximum Drawdown has been -6.58 points.

I would also use the win rate to find the Expected Losing Sequence, and multiply that by x2, x3 or x4 to judge the bank size you need to allot to this strategy. (x2 = aggressive, x3 = standard, x4 = conservative bankroll management)

The equation used to calculate the Expected Losing Sequence is: $\text{Log}(n)/-\text{log}(1-\text{SR}) = \text{E.L.S.}$

The Excel formula would be: $=\text{LN}(n)/-\text{LN}((1-(\text{SR}/100)))$ n = number of bets SR = strike rate as a percentage

You can download an ELS calculator Excel File from my BSG site.

<https://bettingssystemsguide.com/els-calculator-estimated-losing-sequence/>

ELS Calculator			Stake for 100 point bank with ELS x4			Volatility Calculator	
Win rate %	Number of bets	ELS	ELS x2	ELS x3	ELS x4	Actual Maximum Drawdown	MDD/ELS ratio
62.3	246	5.64	11.29	16.93	22.57	6.58	1.17
Enter your strategy data above.							
ELS Chart			Rec. Stake			Strategy Volatility	
Number of bets	ELS	ELS x2	ELS x3	ELS x4	Rec. Stake	Low volatility	MDD/ELS ratio
100	4.72	9.44	14.16	18.88	5.30	0 - 1	
500	6.37	12.74	19.11	25.48	3.92	Average volatility	1 - 3
1000	7.08	14.16	21.24	28.32	3.53	Moderate Volatility	3 - 4
2000	7.79	15.58	23.38	31.17	3.21	High Volatility	4+
3000	8.21	16.41	24.62	32.83	3.05		
4000	8.50	17.00	25.51	34.01	2.94		
5000	8.73	17.46	26.19	34.92	2.86		
6000	8.92	17.84	26.75	35.67	2.80		
7000	9.08	18.15	27.23	36.30	2.75		
8000	9.21	18.43	27.64	36.85	2.71		
9000	9.33	18.67	28.00	37.33	2.68		
10000	9.44	18.88	28.32	37.77	2.65		

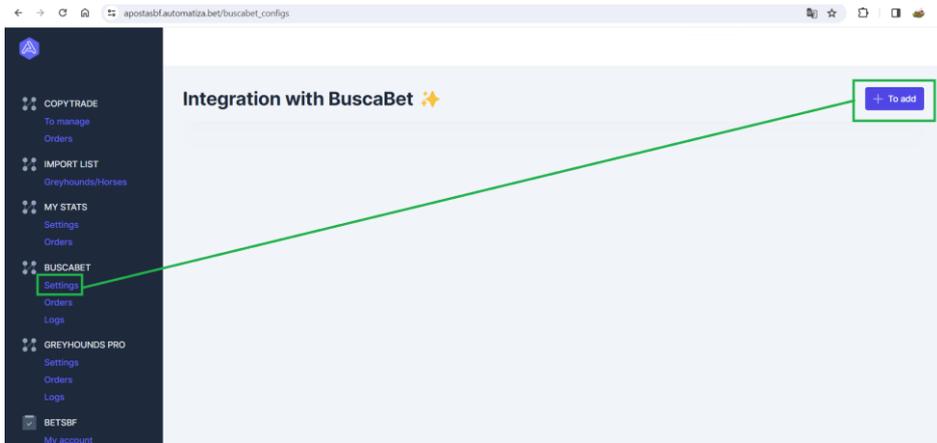

My volatility rating system suggests this strategy has had standard volatility for its win rate and bet numbers.

I would use an ELS x4 based on 1,000 bets for new and unknown strategies to be on the safe side. So I would use a 28 point bank for this. Or with a 100-point bank, bet 3.53 units per bet.

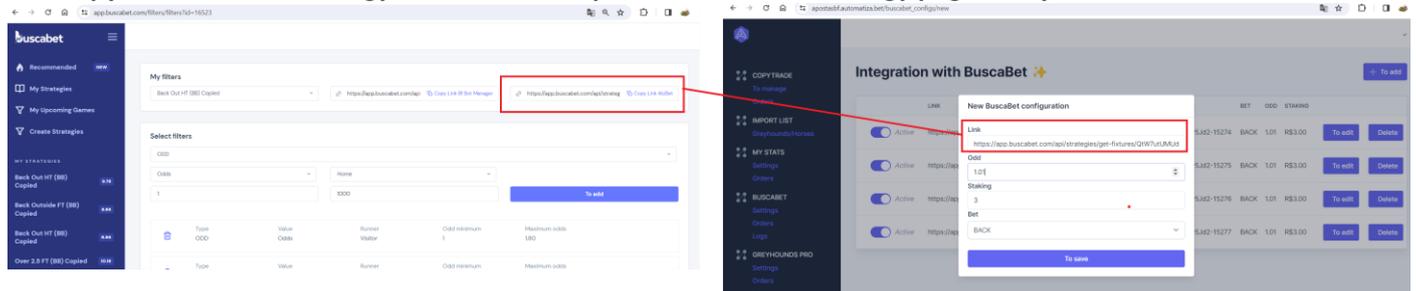

4.3 Go to ATZBET to add and start this strategy.

Click on "Settings".

Click on the "To add" button.

4.4 Copy the BuscaBet strategy URL from the top of the BuscaBet strategy page into your ATZBET form.

You will also need to enter minimum odds and your stake level. (Minimum stake is \$3.)

New BuscaBet configuration

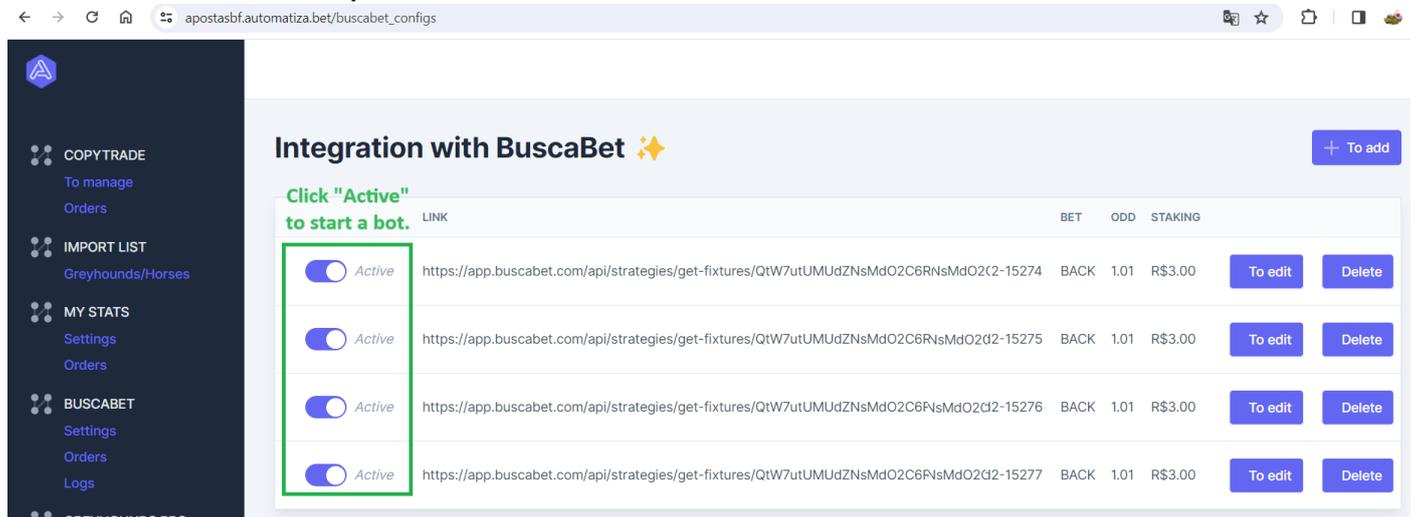

Link **Paste the BuscaBet strategy URL here.**

Odd **Set the minimum odds you will accept bets for. I usually set it to 1.01.**

Staking **Set your stake. Minimum is \$3.**

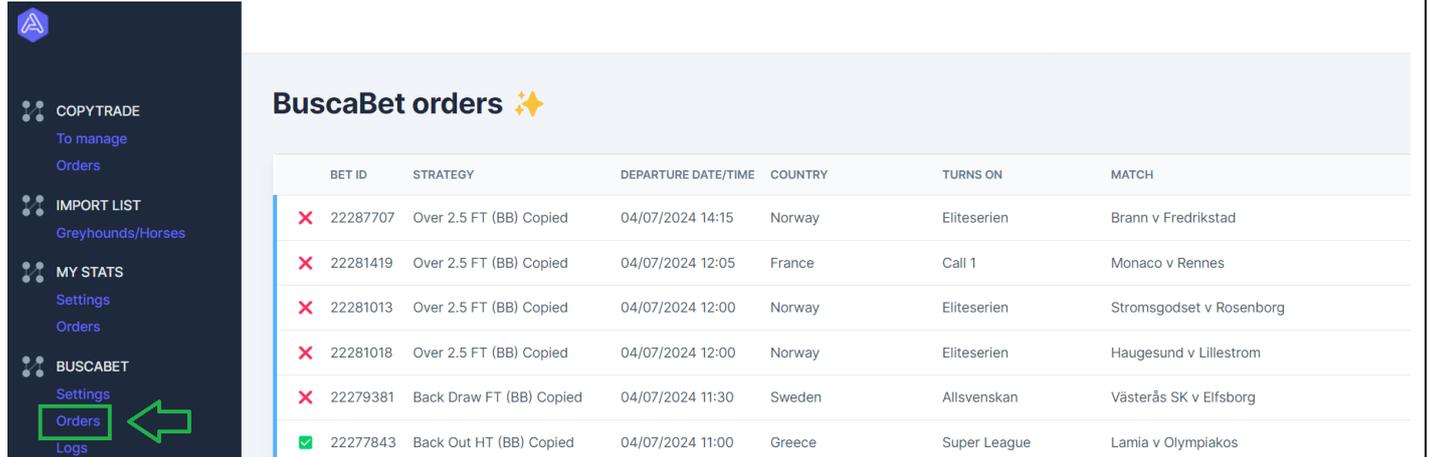

Bet **Set the bet type.**

4.5 Click "Active" to start or pause a bot.

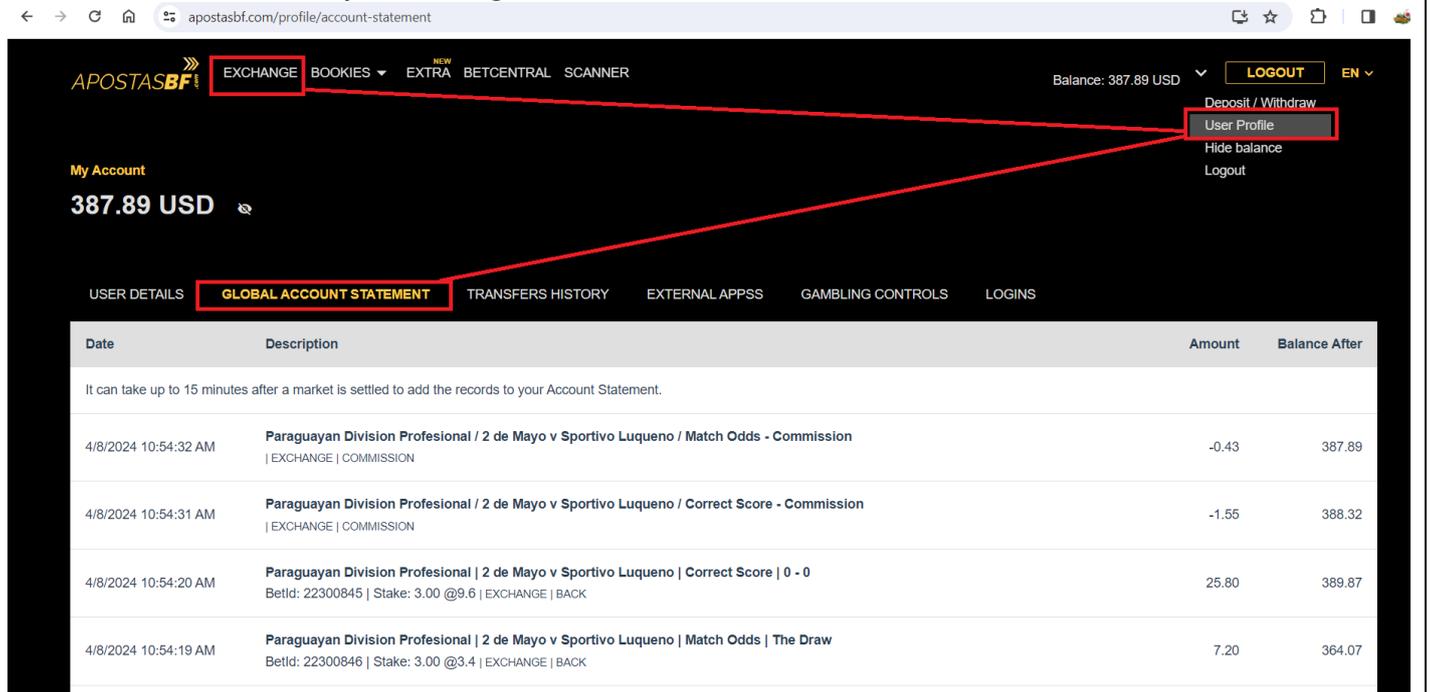

5 View your bets and account activity

5.1 You can view ATZBET and BuscaBet bets in the "Orders" section for each tool.

BET ID	STRATEGY	DEPARTURE DATE/TIME	COUNTRY	TURNS ON	MATCH

6 Connect to the various ApostasBF tools

6.1 Click on the “EXTRA” page to connect to a variety of other tools.

The screenshot shows the ApostasBF website navigation bar with 'EXTRA' highlighted in a green box. Below the navigation bar, there are three tool cards:

- MyStats**: Plataforma completa para análises de estatísticas de futebol com integrações diversas, automações e 100% gratuita para usuários da ApostasBF. [CLIQUE AQUI](#)
- BFStats**: Ferramenta de estatísticas de futebol que permite localizar os melhores jogos rapidamente. [CLIQUE AQUI](#)
- BFOdds**: Ferramenta que facilita a localização de jogos filtrando pelas odds dos principais mercados. [CLIQUE AQUI](#)

6.2 Go to Bet Central to view a graph of your bank progress.

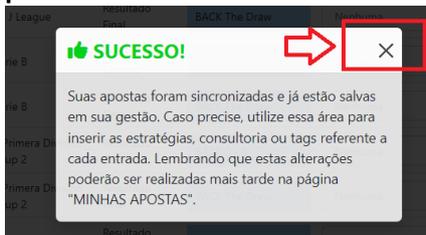

Click on “SINCORNIZAR DADOS” to update the Bet Central tool with your latest account data.

The screenshot shows the ApostasBF website with the 'BETCENTRAL' page selected. In the 'Movimentações' section, the 'SINCORNIZAR DADOS' button is highlighted with a red box and a red arrow pointing to it.

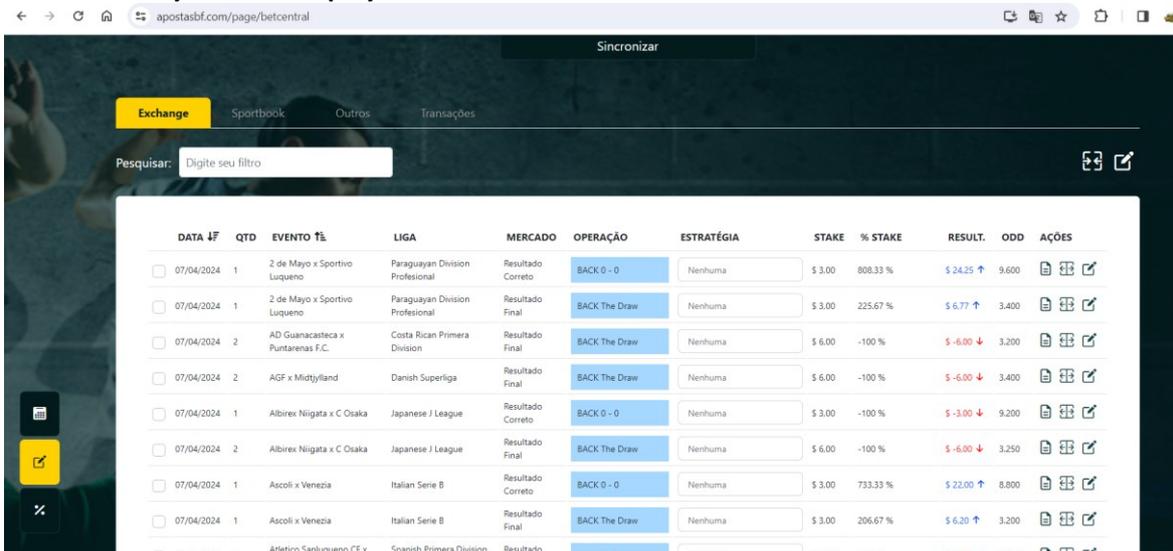

Click on “SINCORNIZAR”. It will import the data up to the last 3 months.

The screenshot shows the 'SINCORNIZAR DADOS' page on the ApostasBF website. The page displays the last synchronization date: 'Último sincronismo: 06/04/2024 19:34:14'. Below this, it states 'Disponível dados dos últimos 3 meses' and 'NENHUM DADO SINCORNIZADO!'. A red arrow points to the 'Sincronizar' button.

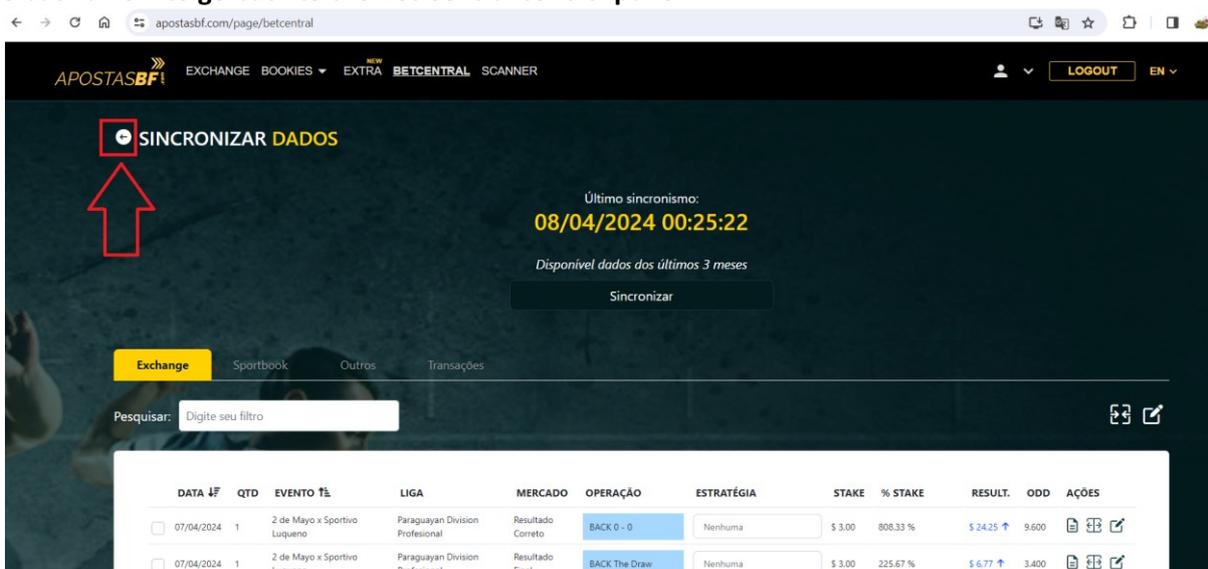

Click the cross on the "SUCESSO!" pop up box.

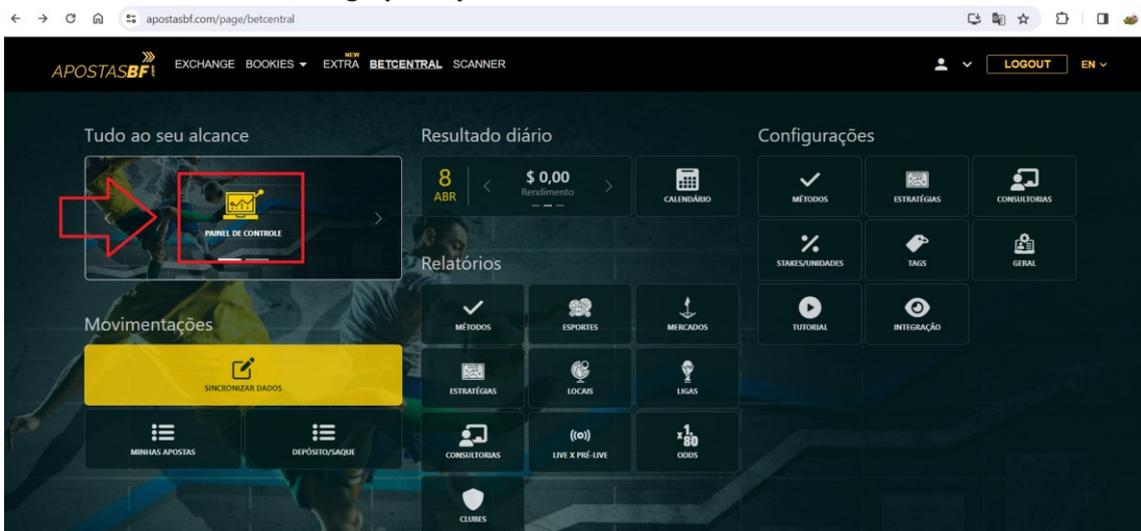

You will be able to see your bets displayed.

Click the back arrow to go back to the Bet Central control panel.

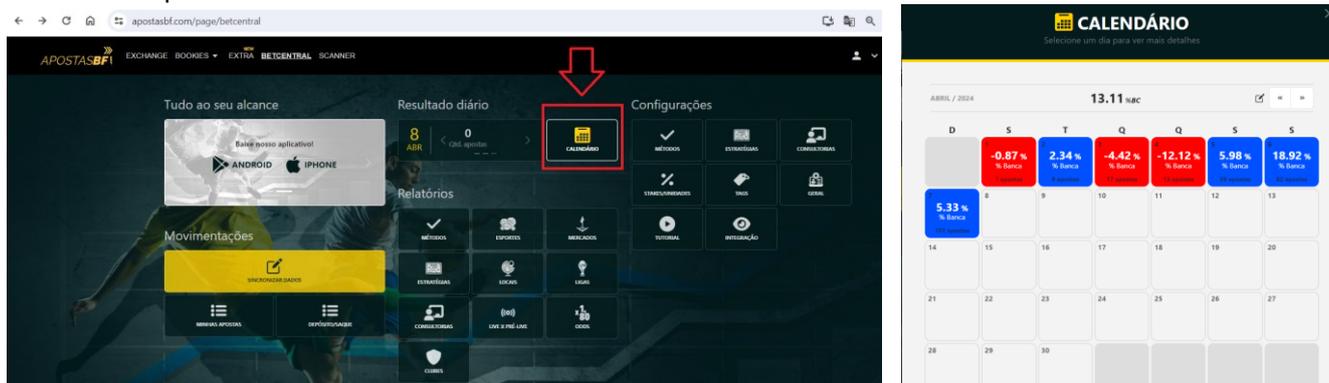

Click on "Panel de Controle" to view a graph of your results.

You can see your bank progress in a nice graph.
 The dates shown can be edited on the top right.
 Use the back arrow at the top left to return to the previous screen.

You can click on "CALENÁRIO" to see your P/L shown on a daily basis. It shows the % change of your bank and the number of bets placed.

If you click on a date, it will give you more details on that day including each individual bet that was placed.
